Helsinki Administrative Court, Clarification Against Unjust Placement of Our Child in Alleged “Foster Care”

Child Destruction in Finland

“Finnish social workers have never heard our voices; instead, they always falsified facts and words. Finnish police have never investigated our notices of crimes against social workers; instead, they investigated all fake notices of crime against us. They said that social workers said so and they did so. Finnish courts have never, until today, made any decisions beneficial to us; instead, they have made several decisions against us, or rejecting our appeals. They also said that social workers said so and they did so. That’s why we are facing real enemies in this small hidden circle of hidden corruption. There is no judicial independence at all here in Finland. All revolves around a hidden corruptive circle.”

Introduction

In China, particularly in our family, long before our child was born, we prepared for a long time for her mother's pregnancy, so as to ensure that our child born to be healthy and clever.

After she was born, we spent a long time to take care of her at home. Every aspect of taking care of a baby, that you can imagine, was taken into account.

Even after she goes to school, we make our full efforts to ensure that she is healthy and performs well.

Until she was taken away from our family, she was a perfect girl, with good health, good academic

performance, and good skills of family and social connections.

However, in her adolescence, she received some negative information about education, family life and social responsibility, including from some social workers who occasionally met her.

As a result of misguidance, interference and influence for around a year, social workers deprived her of family life.

This is a father's desperate plea for justice echoing a relentless battle against the decisions of child protection social workers, submits a poignant and detailed clarification challenging the placement of his child into what he terms a deceptive "foster care." This document serves as a compelling exposé, shedding light on a labyrinth of alleged misconduct, discrimination, and profiteering within the child protection system.

Divided into nine gripping chapters, each unveils a layer of the complex narrative that we weave to contest the actions of those entrusted with safeguarding the well-being of his family. From the poignant tale of a grieving child on September 22, 2022, to the damning accusations of racial bias and profit-driven decisions, the document unearths a sequence of events that has left a family shattered and a child scarred.

Part II delves into the harrowing realm of physical and mental control, where accusations of manipulation, prevention of parent-child meetings, and the administration of questionable psychiatric drugs paint a disturbing picture of a system seemingly more concerned with its own interests than the welfare of the child.

We expose what he labels a "Perhekoti Scam" in Part III, revealing an alleged scheme by social workers to deceive our child into another private

institution, highlighting poor conditions and mistreatment.

Part IV lays bare the accusation that social workers operated with personal gain in mind, aiming to dismantle the family structure for their own benefit, irrespective of the impact on the child.

As the narrative unfolds, we challenge assumptions about our family in Part V, citing a lack of cooperation from social workers and an avoidance of independent investigations.

Part VI takes a sharp turn into the alleged machinations of social workers attempting to frame parents into traps, discrediting the family and fabricating reasons for removal.

Accusations of falsification take center stage in Part VII, with claims that social workers disregarded cultural nuances, manipulated information, and operated with a disrespectful bias.

In Part VIII, we confront a "Blank Claim of Child Benefit," challenging the validity of the purported welfare improvements claimed by social workers and demanding an independent committee to investigate.

Part IX is an updated table listing the facts how the Finnish child protection social workers destroyed our child's life. In nearly all aspects, her life becomes worse and worse. This is directly refuting any claims that the social workers made that they are for the benefit of the child. History proves that these social workers lied in the past, they are lying now, and they will lie in the future.

The document concludes with a series of requests in Part X, urging the court to overturn decisions, initiating investigations, and demanding accountability from social workers.

Our writing serves as a compelling narrative that transcends the confines of a legal document,

offering readers a poignant glimpse into a father's relentless pursuit of justice within a system marred by allegations of misconduct and systemic flaws.

Part I. Non-existence of Urgent Situation on September 22, 2022

The child went to school on September 22, 2022 and cried in the school teachers' room. The background is that her mother's mother died in September and the 20th of September was funeral. The whole family was in deep sorrow and also tired. The child also was tired, had emotional expression and was easy to cry.

However, the teacher gave notice to social workers. Social workers came to school. They did not tell parents about the situation nor gave us an opportunity to clarify the situation. They simply imagined that the child suffered from mental violence at home. They made their decision based on their malicious imagination. By this decision,

our child was placed in a private "foster family", which was newly established by private persons and qualified by social workers. By taking our child, they can fill the vacancies of the new "foster family".

They did not have factual and legal basis and did not abide by due procedure. On the contrary, they are racism and profit motivated.

By saying they are racism-motivated, we have proof that they discriminated against our family based on race, for example, they wanted to assimilate our child into Finnish culture and reject our own cultural background. They fabricated that she is "Finlandized" in the name of her mother. But her mother said that this is completely a fabrication. She did not say such words. In addition, they discredited our family' education skills and discredited the child as "speaking Finnish badly", even though she was born in Finland and went to

Finnish daycare, primary school and is studying at Finnish junior middle school and got very good Finnish language skills.

By saying they are profit-motivated, it is because they put her into private companies that were established by private persons and recognized by social workers as qualified to accept "fostered children". By doing so, the private companies can get state subsidies from the Finnish government. But these companies must be qualified by social workers. Therefore, there is a motivation to develop the relationship between these companies and social workers.

After the incident, our child suffered from psychological trauma, became depressed, suffered insomnia, and anxiety. Even worse, social workers' actions caused all these effects, they conspired with child protection psychologists and psychiatrists (not independent doctors) and prescribed her

psychiatric drugs including Seronil and Ketipinor, both not designed for use for underage children. They use these medicines simply for controlling our child so that she does not miss family, does cry, does not stay overnight, does not think about going home. They use these drugs for her simply for ease of their job. There is no other explanation.

Part II. Physical and Mental Control

However, they pretend all these as if they are child protectors and cheat the child, cheat the society and defraud state subsidies.

On the first day when she was taken to the first ”foster family”, the owner contacted us to request our child’s clothes and school books. They tricked us that the child stays there only for a few days. We asked to meet the child. The owner of the private “foster family” told us that they could not permit us to meet our child, because the social workers did not permit the owner to do so. If the owner permits us to meet, the owner’s facility will be disqualified, saying that “our job will be lost”. In order to support our child to continue her school education, we prepared her clothes and books for

the businessman to take. Among the clothes was a newly bought dark blue warm coat valued 300 euros. Later, when the child was moved to other places, the warm coat was left there and never recovered by us again.

During her stay in this private “foster family”, they arranged the child to visit a psychologist. Her role is not to help her to come home. The first time when our child met her, my child requested to come home. However, the psychologist told our child that “you cannot go home automatically”, telling her to keep distance with parents and family.

In reality, our child never gave up her hope to come home. But she was physically prevented by foster family, psychologically prevented by a psychologist. Both were lackeys and minions of social workers. They do not serve the people. They serve only the social workers.

In addition, when our child was in this private foster family, she suffered from serious insomnia, anxiety, and requested different professionals to come home. However, they rejected all of her requests. One day after about a month, she went to school crying again. This time, the teacher reported to the social workers again. There is apparent indication that she was abused in the private foster family, as in many cases happened in Finland. However, social workers did not identify this situation as having suffered “mental violence”. Our child was simply moved to another place. Their gangster logic is that, the child suffered from mental violence when her grandmother died, but she did not suffer from mental violence when she really suffered from psychological trauma due to their removal from family, and abuse in the private foster family.

She moved to Herttoniemi Vastaanotto. Many workers there have exactly the same idea as us, that

our child was mistakenly removed from the family, that our family is a normal family, that our child suffered from psychological problems due to social workers' arbitrary actions. However, these workers are not independent decision-makers. Some of them lost credit due to their coping with the social workers. At that time, we have already appealed against the social workers' decisions and social workers pressure them to collect information negative to us. Partly due to the revelation of the truths by workers in Herttoniemi Vastaanotto, social workers, psychologists and psychiatrists conspired with each other and fed our child psychiatric drugs. This way, they can control the child and at the same tie conceal their negligent mistakes or intentional crimes. Anne always told us that our family is normal, the child was mistakenly removed and the child's coping with the social workers is wrong. However, when she drafted a statement for social workers, she overturned all her

previous viewpoints and wrote one very beneficial to social workers' intentions.

During her stay in Herttoniemi Vastaanotto, they social workers threatened the child that our family is not safe and she maybe killed or commit suicide if she goes home. Psychologists continue to cheat her into not going home. Psychiatrist prescribed her psychiatric drugs to suppress her desire to go home.

It is not our child that does not want to meet us or not go home. It is those people who controlled her that prevented her from contacting us and coming home.

A worker named Niina helped us a lot. She helped arrange a meeting between our child and me. However, without good method and skill, Anne did not succeed in arranging the real meeting. Anne either lacked the skill to work with a child, or overly coped with social workers who supervised

her job. She lacks independent decision-making capacity.

Other workers named Carolina and Sole also helped us a lot. Both said that they had the experience of leaving parents. They understand that humanly an adolescent can have ideas that are different from parents and resist contacting or meeting with parents. However, with correct guidance and instruction, the relationship between parents and children can be repaired.

However, isolation and alienation are methods that social workers used to separate children from parents, so that the child can be kept in private companies to make money through defrauding state subsidies. This is the only purpose of their actions. If there are not these private foster families, there will be no reason for our child to be removed from the family.

Part III. “Perhekoti” Scam

During her placement in Herttoniemi Vastaanotto, social workers tricked out child to accept an offer to put her into a “perhekoti”, which is another business that is established by private persons and recognized by social workers to accommodate children who are removed by social workers from families.

Social workers told us that we do not need to pay anything. The country pays for everything.

They told us that the man is a doctor and the lady is a nurse. They are very good at taking care of children, as many as seven.

During her stay in the perhekoti, nothing gets better. On the contrary, they administered more and more

psychiatric drugs, in a purpose to control her as easy as a “zombie”.

She did not get any clothes even if the seasons changed.

She did not get good food, and started an extreme idea to eat only vegetables. not meet.

On the weekend, our child was fed a whole week’s medicine. She was poisoned. She has to be hospitalized in a hospital for two weeks. After that, she also needs to visit the hospital once a week.

She found a summer practical training chance in a cafe and she needed a head covering. No one prepared for her and she had to buy it by herself. As a result, she took such things, valued 2 euros, to the perhekoti under unclear situations. The workers there accompanied her back to the shop and the

shop owner reported to the police. This kind of wrong handling and low-level mistakes by workers there put her into a very dangerous situation.

In order to get rid of our child, social workers needed to lie again and again. This time, they did not pretend that the perhekoti is the best place for our child. They said that the perhekoti is to be closed and our child has to move again. All other children are still there, but our child has to leave.

The excuse for the moving is that the owners, the doctor and the nurse, are not permitted to operate the business at the same time when they are also working as doctor and nurse.

However, until today, the perhekoti is still in operation and has no traces of closing.

Part IV. Social Work for Their Private Benefit

From the start, social workers did not provide any help to our family. On the contrary, they tried to destroy our family. They did not provide any help to the child. On the contrary, they destroyed our child's life. At every stage, we can clearly identify social worker's own benefits, but not benefits for us.

We appealed against them, they had to pressure our child to testify for them. They have not methods, no evidence and no skill to persecute us, but to seek help from an underage child who is under their control.

These testimonies are invalid.

Or else, they have to be held liable for all their professional mistakes and malicious intentions.

Part V. Fabricated Assumptions

1. They have an assumption that our family is not safe.

In our family, there was no mental or physical violence at home.

We provided and are providing full support for our child full-heartedly. Everything was good when she was at home. Everything became worse when she was taken from family. However, our support continued and she got better support from us, including food, clothes, education, schedule and planning.

Anyway, under control of outside forces, her situation becomes worse and worse.

She is not safer than when she was at home. Refer to “Finnish social workers destroyed our child’s life”.

2. They have an assumption that our child did not want to contact or meet with us. The reason is that they prevent her from contacting or meeting with us.

3. They have an assumption that we do not cooperate with social workers. In fact, social workers rejected all our requests and did not cooperate with us. Their actions are motivated with malicious intentions and driven by profit.

4. They have an assumption that we do not provide new information and evidence. This is social

workers' final trick to maintain their wrong decisions. They try to prevent the court from initiating independent investigations.

I advise the court not to give up independence and collaborate with social workers. I and social workers are equal parties in this case. You must hear both sides, investigate both sides, but not be submissive to social workers and make only decisions according to their pressure and benefits.

Part VI. Social Workers Wanted to Frame Parents into Their Traps

1. They continuously seek to look for our own psychological status and want to discredit our personality.

2. They recommended their collaborated lawyers to “help” us so that they can control the process from start to the end.

3. They seek to identify that we lose work capacity because we were heavily blown by the removal of our child from the family.

4. They advised us to seek “help” from psychologists and psychiatrists who are their collaborators so that they can carry out controlled arbitrary diagnosis.

5. They controlled the child to refuse coming home. They never told her to come home. On the contrary, they told her to stay outside, provided her minimum living conditions and bribed her with a weekly allowance.

6. They pressure the child to say that parents are not capable of educating her. Whether she said or not, these social workers wrote in their transcripts that our child said so. As an underage child of 14 years old, such a sophisticated judgment and evaluation cannot be from her. Even education experts cannot do such an evaluation. Which family in this world is not capable of educating their children? This is only social workers' criminal gang slang.

7. They seek to fabricate that parents are in a three-shift job and cannot take care of our child.

8. They seek to fabricate faults of Chinese culture so that our family is depicted as violent.

9. They refuse to hear our explanation. In every meeting, they give us very little time to express our ideas. Sometimes, they announced the end of the meeting, stood up and left the meeting while we were still talking about the substantial points.

10. They refuse to hear our family's merits and strongness in knowledge, education and work.

11. They pretend to have hearings, but they have already made the decision before that. When they held a hearing for parents about the change of our child's moving from one place to another, our child has already got their decision. Therefore, all of their decisions are made without abiding by due procedure.

12. Their decision took effect first and their decision was made after that. After we pointed out their illegality, they tried to change the date in several other decisions. However, the decision will take effect before the decision is really made.

Exploiting the time lag, they prevent us from getting real information and expressing our real will.

13. They tricked us with wrong information. They told us that we do not need to pay anything in exchange for our consent. They told us that they help our family and our child, however, they did not provide any help either to the family or to the child. We can read a lot about how they cheated our child. However, they did not write all that they cheated her. They hide most of their pressure, cheating, frightening, threatening, lying, dishonesty, illegality, immorality, and of course their profit from their actions.

14. There is not an ideal family model. Our family is one of the best families in the world. Social workers simply want to destroy us. The child's situation became worse and worse after she was removed from the family.

15. Our child's real will is extorted by social workers' actions. Even if she wants to leave home, this is not the reason for her removal. Everyone wants to become president, can you arrange everyone to be president? Many children want to be independent, but you cannot make this before she is capable of independent life.

16. "The lesser of two evils". We must consider which alternative is more beneficial to the child and which is more harmful to the child. Social workers' have no proof that our child is better off. They have no word to say when we list what harms, evils and persecutions they did to our child. Their lies cannot be proved to be good according to any standards.

17. They collect as many "notices" from someone to social workers and regarded this as an indication for the child's removal. They care about number but not quality and reality. In one document, they

calculated the number to 7 notices. All of them are ridiculous notices. Here are some examples:

(1) One of them was made by a singing instructor. The child's father brought the child strawberries and the teachers thought they are for her. However, her father said they are for the child and left. The teacher gave a notice to the social workers, saying that the father abused the child.

(2) Another notice was made by teachers to the social workers, because the child was abused by foster family "Marra" and cried at school. How should social workers count this one into the number?

(3) Another notice was given to social workers by a hobby instructor from Nuorten Ääni toimitus. When she saw that the child was tired and exhausted, she made a report suspecting that the child was abused at home. In fact, the hobby place abused her and exploited her, because they cheated

her that she can go to the hobby whenever she wanted, and she was absent from school for many hours by going to the hobby. The hobby also opens after school. The child spent a whole day at school. After school, she was attracted and lured to the hobby place to spend 3-4 more hours. She does not do homework because when she goes back to the living place, it is always too late, and she is tired. The hobby places never contact with parents about the consent of the parents and the welfare of the child. Instead, they imagine that they can find a method for the child to act as a president or prime minister without going to school studying anything. In sum, all these notices are maliciously motivated and stories are imagined. The same place also refused us to meet our child there even though our child had already invited us to visit the place and help her.

(4) Another infamous notice was given by the school curator to social workers for our child's

writing about an innovative essay. Followed by the report, schoolteachers and social workers destroyed the essay so that we can never have any evidence about their conspiracy.

(5) The school curator made both a criminal report and a notice to the social workers, saying that in our family; there is a death threat to the child. We do not know what the child told her, but we know that the curator was illiterate of Chinese culture and did not understand what the child told her about. In sum, all these notices were full of stupidity, illiteracy, immorality, and anti-intellectuality.

It is the role of social workers to investigate notices to them. However, they cannot take every notice as true whenever they get such a notice. Each notice should be investigated with care according to due procedure. Non-investigated notices cannot be taken as evidence either for social work decisions or for court judgment. Non-investigated notices

should be investigated by the court again and the abuse of duty by social workers in exploited baseless notices should be punished.

18. We made crime reports to the police against these persons. But the police did not start an investigation because they are officials of Helsinki city and they are colleagues, so they trust them but do not trust us. This is also gangster logic, not the legal procedure of a judicial organ.

Social workers, in the name of the state, always have the responsibility of raising evidence. They cannot simply claim that something is correct, or something is wrong. They must prove with evidence, facts, and laws. If they cannot raise any evidence but claim that something is something, that is the same as Gestapo and Gulag. People will go to revolution against their arbitrary and malicious actions. If the country cannot punish

these professional criminals exploiting the name of the child protection with a long history of crime, people will punish these criminals by themselves.

Part VII. Social Workers Rely on Falsification

They do not have respect for any citizens with children, particularly people with foreign origins. They imagine that foreigners are barbarians and treat them with full arrogance and scorn. They are not willing to learn from other cultures, races and religions. That is not necessary for ordinary people. But for them, they always want to take our children away from our family, they must learn minimum knowledge about our race, our culture, our religion, our family life and our personality. They cannot simply imagine and pretend to know everything and pretend to do everything correctly. In our case, they are wrong, and they commit crimes.

I asked them to consult experts of Chinese culture. They never considered the request. Even if they

employed interpreters, they always hired someone who is not capable of interpreting correctly, someone even could not speak correct Chinese or Finnish. Someone even interpreted only the last sentences of the paragraphs. We wrote to social workers and other workers about this, and they just ignored our request. Some interpreters were hired two or more times, with the same problem remaining. This way, social workers can easily falsify our words and meeting transcripts, and they also falsify and beautify their own words. In their decisions and other documents, these falsified words and transcripts were used to prove their claims. In many cases in Finland, victims of social workers' arbitrary actions witnessed the same problem that these people are accustomed to falsifying and fabricating in child protection cases.

Social workers' purpose was to take our child from the family, not to benefit her welfare. They argued that they have reasons to keep her outside, but they

did not give any reason that if our child is at home, what benefits she can get. In fact, she can be better when at home than when she is outside. Social workers only have strong words, but not real content.

Part VIII. Blank Claim of Child Benefit

The maximum benefit for the child is only a blank promise like air. Social workers represent the state, they must have substantive content in claiming anything. Can they really give some substantive content about our child's welfare? I don't think they can, except in the case they lie. I request the court to name an independent committee to investigate and identify the welfare of our child. This will prove their criminal consequences. We, as parents, have already proved the destruction of our child's life many months ago. Social workers are not able to present any different ideas with that. We ask the court to collect evidence under oaths, but not only from social workers' air-like claims.

Where and what is my child's maximum benefits?

Suffered from trauma, depression and insomnia due to arbitrary removal from family and isolated from parents with whom she has lived for 14 years;

Diagnosed with diseases without sufficient information from the persons who have most knowledge and understanding of her cultural, health, psychological, educational and family backgrounds;

Absent from school on a daily basis. Her academic performance was changed from top to bottom in her class. She was interested in going to top universities in the world. However, she was brainwashed by one of the social workers, Karita Rasinkangas, who misguided her that: "You do not need to go to high school (lukio)";

Quitting hobbies (piano) she attended for 6 years during which the piano teachers praised her that she

has talent, but she has to take hobbies only free of charge because no one pay for her and parents' advices and payments for the hobbies are rejected;

Lost both family friends and school friends because no one is willing to take the risk to make friends with a "fostered child" in a "child prison";

Isolated from social life due to the bad reputation as a "fostered child" in a "child prison";

Workers from the foster care can insult her parents as much as they want;

The child only eats basic foods and wear second-hand clothes and does not get necessary supplies meeting her daily needs. In Finland in the 2020s, how you think that a child does not have strawberries or blueberries, or even apples or bananas to eat while staring at adults who are eating them? How do you think that while adults are eating meats and fish, while they tell the child

that eating vegetables is good for environment and you'd better not eat them. How do you think that those rich foster business adults drive Benz cars, wear brand-clothes, while their "foster children" were told to visit second-hand shops to pick up suitable clothes, or even pick up those discarded clothes not suitable for sale?

In a word, those social workers who worked in the case of our child must be investigated and punished.

Part IX. Finnish Social Workers Destroyed Our Child's Life

According to child protection law of Finland: "Child welfare must promote the favourable development and wellbeing of the child. Child welfare must provide support in child upbringing and care for parents, custodians and other persons responsible for childcare and upbringing. Child welfare must be aimed at preventing child and family problems and intervening sufficiently early if problems are found. When assessing the need for child welfare and in the provision of child welfare, it is first and foremost the interests of the child that must be taken into account." (Lastensuojelulaki 13.4.2007/417, 1 luku 4§). If social workers abide by law, is it very absurd that while they did not find any problems from the family, they fabricated problems and imposed false assessment on parents?

As a result, the child interest has not been ensured but destroyed. Finnish social workers lie again, again and again. The child's situation become worse, worse and worse. They destroy thousands of children but pretending to help them.

	Before September 22nd, 2022 **Parents' normal family life**	**After September 22nd, 2022** **Social workers' so-called "maximum interest of the child"**
Privacy	Normal personal life, enjoying	Social workers and workers in foster care released information about her foster care to

	full privacy	many irrelevant persons and institutions, including but not limited to Luoteis-Helsingin musiikkiopisto, Kannelmäen nuorisotalo, a daycare near Pasila where out child did work placement (leading her to fail in getting summer job), two shops where unclear and doubtful incidents occurred in summer of 2023, etc.
Social status	"Small princess" in our family. She was brave and	Slave? Or captive? Under misleading, threat, poisoning and control of social workers, colluded with other players of the

	confident, discussing with her parents equally.	same interest groups. She is now very timid and weak when she talks. She always glances right and left, asking for advice from social workers and workers of perhekoti. She makes small decisions relying on others' attitude. Her confidence has been destroyed. However, the social workers forced her to publicly claim that she is well and she is independent. She is not as well as before she was removed from our family.

		Nothing has become better.
Telephone	Putting away at night	Self-managed at night. In several cases, at least when she was in Herttoniemi Vaastanotto, she used her telephone as late as 23:00 or 24:00 o'clock. She wouldn't stop unless we called there and asked friendly personnel to check whether she was sleeping.
Sleep	Sleeping at 22:00	Unknown. In Herttoniemi, when we called the personnel there at midnight, she

		went to sleep around 23:00 or 24:00, or even late.
Diagnosis of diseases	Parents' involvement	Parents' participation is absolutely rejected. We have knowledge about the health status of our child and her development over 14 years. However, her diagnosis of diseases was manipulated by social workers, school teachers as well as other collaborators.
Depression	No depression, need of	Seronil 30 mg daily. According to information from perhekoti, she was very well. However, the

	medicine	dose was increased to 40 mg after she visited päiväsairaala for 2 weeks. The diagnosis has been manipulated by social workers, psychologists and other workers. Parents have been excluded from the treatment. Information has never been given to parents.
Abuse of Medicines	No	On April 9, 2023, she took 4 days' medicines in one day. This accident led to two weeks of päiväsairaala visit. Yet, she visits the

		päiväsairaala once evey week.
Insomnia	Seldom	Frequent. Or in fact not insomnia at all. However, in order to control her easily, they administer sleeping pills Ketipinor every night. This is inhuman practice because sleeping pills are usually used when necessary but not everyday. They caused her insomnia and poisoned her with sleeping pills every night.

Sleeping pill	No sleeping pill	Ketipinor 12.5 mg everyday (prescription: 25mg when necessary). According to information from Perhekoti Elämä Helmi, she sleeps very well when taking 12,5mg of Ketipinor. However, the dose was increased to 25 mg regularly everyday after she visited päiväsairaala for 2 weeks.
Eyesight	No problem	Eyesight damaged, she needs to wear glasses from April 2023. The glasses were ready around May. Exact information was not available for the family because they retain

		all exact information to conceal the bad results from their acts.
Library	Very frequent visit, borrowing books up to 41 copies. We encouraged her to borrow around 5 books at a time, but not so many. When she	Seldom, no books borrowed (as of May 7th, 2023). It was an extreme situation that she returned all the books but did not borrow one for a long time. That was the result of her being isolated, alienated, poisoned, and misled towards a wrong direction of lifestyle.

	was in Herttoniemi Vaastanotto, she borrowed more than 40 books.	
School	Seldom being late and absent. We provided sufficient support for her school going. In difficult times, we	Frequently late and absent from school. On many occasions, she had to go for appointments made by social workers, police officers, psychologists, psychiatrists, and other unknown persons involved in the child protection industry. Even after she was transferred

	escorted her to school.	to Perhekoti Elämä Helmi, social workers from Lännen Lastensuojelu Lassila 1, Kaupintie 11 A 00440 Helsinki, still pressed her to provide testimonies beneficial to these social workers who in fact did not do bad things against herself and harmed her psychologically and physically. In addition to the bad environment for her life, no one supports and instructs her to accept a good education. Her future will be destroyed

		step-by-step by social workers and workers of Perhekoti, because they do not care about her education, her study and her intellectual development.
Academic performance	Excellent	Many exams were skipped. Because she missed many lessons, she had to take special instructions and she got exams at a level lower than other students. Therefore, this can affect her real academic performance even if the scores are the same.

Family	Normal family life	No family life is allowed, permitted, and guaranteed. Other family members are prevented from meeting her freely. Family travel is prohibited by social workers. Her freedom is illegally limited. Situation was changed after June, she started to meet parents and other relatives. She spent her time with her family in restaurants, shops, some gardens and parks, overnight at a hotel, etc. It proved that she enjoyed the time with her family.

Nutrition	Regularly eating good nutritious foods, vegetables, nuts, snacks during hobby lessons.	Unknown. On one occasion in June 2023, I asked her whether she ate strawberries and blueberries which are very common in Finland, she answered that no, very rare.
	Strawberries and blueberries are very normal and common when she was home.	She also said that she should eat vegetables rather than meat. We are aware that her worldview has been changed significantly, accepting many ambiguous ideas as correct or certain, due to lack of daily necessities or wrong instructions

		from somewhere. We can understand that the purpose of this kind of business model is to generate as more profit as possible, but not providing normal consumption and enjoyment as normal families. She enjoyed berries, fruits and nuts when we get together. She does not refuse meat and fish either.
Friends	School friends, family	Lost school friends, lost family friends

	friends, hobby friends	
Outdoor and recreation activities	Walking, running, gardening, swinging, cycling, skiing, skating, climbing mountains, swimming, sunbathing, singing, piano playing,	Unknown, mostly in own room playing telephone and using computer. Sometimes going shopping with workers in perhekoti. She told her parents that she also walks dogs, rides a bicycle, etc. At the weekend, she visits library etc.

Communications	Talking with parents, sister, friends, getting together with big Chinese community	Limited to foster family. Under our request, the Perhekoti promised to fix a call time every week. Later, the Perhekoti decided that there won't be such a time. When they received a supplement to our appeal to the administrative court, they promised to fix a time again on the May 16th, 2023 meeting. From June 2023, due to our discussion with the Perhekoti, she could keep frequent communication with parents.

Isolation and alienation by social workers	She grew up in our arms, on our shoulders, hands-in-hands	Nothing. On May 16th, 2023, in order to perform as a theater that the social workers did not destroy the parents-child relationship, social workers arranged our child to participate in a meeting, which originally our child was prohibited to attend. At the meeting, social workers arranged her to tell her parents that the social workers did not prevent her from contacting her parents. She did not greet her parents, did not permit her

		parents to speak Chinese, nor wanted to sit opposite her parents. Not until July 1st, 2023, did her parents have the first short independent meeting for around 10 minutes. The purpose was to bring some books. In whole summer of 2023, when current social worker was in holidays and a temporary social worker was in place, our child got more freedom. She answered to our calls at any time, answered to our messages at any time, we spent time at home, in

		restaurants and on sightseeing freely and without limit. Our child enjoyed the time and sent social worker message to request to disassemble the “huostaanotto”. By then, the current social worker was back from her holidays and imposed limit on communication and contact between us and our child. The social worker told the child that our family is not safe and we do not cooperate with the social worker. The limit also became an infamous topic in a meeting that Tuulia and

		Matti, both workers from Lastenkoti Sininen, participated in. In fact, our family is safe. And the social worker refuses to cooperate with us. Her only purpose is to isolate and alienate the child from parents. She does not provide any help to us. Please ask her, what help does she provide?
Health situation	Influenza once a year	9 times in past 9 months 1 time (in Marra Marjoniemi's) 2 times (in Herttoniemi Vaastanotto)

		4 times (in Perhekoti Elämä Helmi: more than a week leave, headache) 2 time in Lastenkoti Sininen
Expenses	Quality housing, foods and clothes within whole family budget	We have to pay 700 euros per month, financial exploitation of family. This sum is from our after-tax pure income.
Hobbies	She likes piano, singing, and other	Because it needs payment, when she was in the Perhekoti Elämä Helmi, she had to stop her

	activities. We paid about 1000 euros every year.	music hobbies. Neither did she ask for her parents to support financially. As a result, she only had some hobbies free of charge. Before, she had piano courses. She was interested in the hobby. The piano teacher said that she has talent in playing piano. However, after she was put in foster care, the piano course was terminated.
Social connections	I am the Vice President	When she was removed from home, her participation in the

	of Finland China Artists Association. When she was home, she participated in many activities held by our association.	activities were interfered with by others. In the 2023 summer, our association organized a summer internship for a limited number of participants to write children's stories. I sent the information to her and her sister. Her sister also sent the information to her. She applied and was approved but certain personnel in Perhekoti Elämä Helmi limited her by requiring her to get consent from the personnel there. One person named "Suvi" (email:

		thisisourstory2@gmail.com) sent an email message to our contact email address, saying that the recipient is a “liar”. In order not to distract our main target of helping our child by tiny annoyances, we have to refrain from the contact.

Part X. Requests

(1) To overturn any decisions made by child protection social workers about our child's removal from family and change of places, free our child.

(2) We reserve our rights to pursue civil, administrative and criminal liabilities against these social workers.

(3) To immediately start independent investigation about the mistakes, malicious intentions, economic motivation, criminal conspiracy of these social workers and their collaborators of psychologists, psychiatrists, institution workers, and foster family businesspersons.

(4) "The child does not want to go home" is not a reason for her not to come home. This is caused by

social workers' actions of removing her from family, actions of isolation and alienation, actions of anti-humanity tricks, actions of illiteracy, stupidity, immorality and anti-intellectuality.

(5) The child's diagnosis of depression is not a reason to keep her outside of the family. She did not have any syndrome before she was taken away from family. Her syndromes were from her removal from the family by social workers under unnecessary conditions.

(6) Social workers apparently do not abide by law, nor do they have ethics. They must be discharged from their duty and qualified workers should be hired to do the job.

(7) What these social workers need the most is knowledge. They are really badly educated for getting their qualification and getting their job. Please command the social workers to answer these questions: a. What are human beings? Are they

human beings and what are their proofs? b. What is normal family life? Do they have normal family life and what are their proofs? These answers must be evaluated by a group of independent researchers who have the knowledge of sociology, law, psychology, human rights, adolescence, human beings, family life, our personality, and our family.

This is a comprehensive document to the Helsinki Administrative Court, challenging the decision of Finnish child protection social workers to place his child in foster care. The submission alleges a range of issues, including racial discrimination, profit motives, and falsification of information by social workers. The document contends that the child suffered psychological trauma due to arbitrary decisions, control measures, and improper administration of psychiatric drugs. The document emphasizes the need for an independent investigation, challenges the credibility of social workers' decisions, and calls for the immediate reversal of the child's placement. The document highlights a series of grievances against the social workers' actions and emphasizes the importance of ensuring the child's well-being and family integrity.
